| SANYO | No. ※ 5385 | STK401-290 |
| | 2ch AF Power Amplifier (Split Power Supply) 50W + 50W, THD = 0.08% | |

Preliminary**Overview**

The STK401-290 is a 2-channel audio power amplifier IC that supports $6/3\Omega$ output load impedances. It is fully pin compatible with the 3-channel output devices (STK400-×00 series) and 2-channel output devices (STK401-×00 series). In addition, it supports $6/3\Omega$ output load impedance.

Features

- Pin compatible with the 3-channel output devices (STK400-×00 series) and 2-channel output devices (STK401-×00 series)
- Output load impedance $R_L = 6/3\Omega$ supported
- Pin configuration grouped into individual blocks of inputs, outputs and supply lines to minimize the adverse effects of pattern layout on operating characteristics.
- Few external components

Package Dimensions

unit: mm

4134

Specifications

Maximum Ratings at Ta = 25°C

| Parameter | Symbol | Conditions | Ratings | Unit |
|---------------------------------------|---------------------|--|-------------|------|
| Maximum supply voltage | V _{CC} max | | ±47 | V |
| Thermal resistance | θj-c | Per power transistor | 1.7 | °C/W |
| Junction temperature | T _j | | 150 | °C |
| Operating substrate temperature | T _c | | 125 | °C |
| Storage temperature | T _{stg} | | -30 to +125 | °C |
| Available time for load short-circuit | t _s | V _{CC} = ±32V, R _L = 6Ω, f = 50Hz, P _O = 50W | 1 | s |

Operating Characteristics at Ta = 25°C, R_L = 6Ω (noninductive load), R_g = 600Ω, V_G = 40dB

| Parameter | Symbol | Conditions | min | typ | max | Unit |
|---------------------------|---------------------------------|---|-----|-----------|------|-------|
| Output power | P _O (1) | V _{CC} = ±32V, f = 20Hz to 20kHz, THD = 0.08% | 50 | 55 | - | W |
| | P _O (2) | V _{CC} = ±26V, f = 1kHz, THD = 0.2%, R _L = 3Ω | 50 | 55 | - | W |
| Total harmonic distortion | THD(1) | V _{CC} = ±32V, f = 20Hz to 20kHz, P _O = 1.0W | - | - | 0.08 | % |
| | THD(2) | V _{CC} = ±32V, f = 1kHz, P _O = 5.0W | - | 0.007 | - | % |
| Frequency response | f _L , f _H | V _{CC} = ±32V, P _O = 1.0W, ⁺⁰ / ₋₃ dB | - | 20 to 50k | - | Hz |
| Input impedance | r _i | V _{CC} = ±32V, f = 1kHz, P _O = 1.0W | - | 55 | - | kΩ |
| Output noise voltage | V _{NO} | V _{CC} = ±39V, R _g = 10kΩ | - | - | 1.2 | mVrms |
| Quiescent current | I _{CCQ} | V _{CC} = ±39V | 20 | 60 | 100 | mA |
| Neutral voltage | V _N | V _{CC} = ±39V | -70 | 0 | +70 | mV |

Notes.

All tests are measured using a constant-voltage supply unless otherwise specified.

Available time for load short-circuit and output noise voltage are measured using the transformer supply specified below.

The output noise voltage is the peak value of an average-reading meter with an rms value scale (VTVM). A regulated AC supply (50Hz) should be used to eliminate the effects of AC primary line flicker noise.

Specified Transformer Supply (MG-200 or Equivalent)

Equivalent Circuit

Sample Application Circuit

STK401-290

Series Configuration

These devices form a series of pin-compatible devices with different number of output channels, output ratings and total harmonic distortion. Some of these devices are under development. Contact your Sanyo sales representative if you require more detailed information.

1. V_{CC} max1 (R_L = 6Ω), V_{CC} max2 (R_L = 3 to 6Ω), V_{CC}1 (R_L = 6Ω), V_{CC}2 (R_L = 3Ω)

Heatsink Design Considerations

The heatsink thermal resistance, θ_{c-a} , required to dissipate the STK401-290 device total power dissipation, P_d , is determined as follows:

Condition 1: IC substrate temperature not to exceed 125°C.

$$P_d \times \theta_{c-a} + T_a < 125^\circ\text{C} \dots\dots\dots (1)$$

where T_a is the guaranteed maximum ambient temperature.

Condition 2: Power transistor junction temperature, T_j , not to exceed 150°C.

$$P_d \times \theta_{c-a} + P_d/N \times \theta_{j-c} + T_a < 150^\circ\text{C} \dots\dots\dots (2)$$

where N is the number of power transistors and θ_{j-c} is the power transistor thermal resistance per transistor. Note that the power dissipated per transistor is the total, P_d , divided evenly among the N power transistors.

Expressions (1) and (2) can be rewritten making θ_{c-a} the subject.

$$\theta_{c-a} < (125 - T_a)/P_d \dots\dots\dots (1)'$$

$$\theta_{c-a} < (150 - T_a)/P_d - \theta_{j-c}/N \dots\dots\dots (2)'$$

The heatsink required must have a thermal resistance that simultaneously satisfies both expressions.

The heatsink thermal resistance can be determined from (1)' and (2)' once the following parameters have been defined.

- Supply voltage: V_{CC}
- Load resistance: R_L
- Guaranteed maximum ambient temperature: T_a

The total device power dissipation when STK401-290 $V_{CC} = \pm 32\text{V}$ and $R_L = 6\Omega$, for a continuous sine wave signal, is a maximum of 71W, as shown in the $P_d - P_O$ graphs.

When estimating the power dissipation for an actual audio signal input, the rule of thumb is to select P_d corresponding to $(1/10) \times P_O \text{ max}$ (within safe limits) for a continuous sine wave input. For example,

$$P_d = 44\text{W [for } (1/10) \times P_O \text{ max} = 5\text{W]}$$

The STK401-290 has 4 power transistors, and the thermal resistance per transistor, θ_{j-c} , is 1.7°C/W. If the guaranteed maximum ambient temperature, T_a , is 50°C, then the required heatsink thermal resistance, θ_{c-a} , is:

$$\text{From expression (1)'}: \theta_{c-a} < (125 - 50)/44 < 1.70$$

$$\text{From expression (2)'}: \theta_{c-a} < (150 - 50)/44 - 1.7/4 < 1.84$$

Therefore, to satisfy both expressions, the required heatsink must have a thermal resistance less than 1.70°C/W.

Similarly, when STK401-290 $V_{CC} = \pm 26\text{V}$ and $R_L = 3\Omega$,

$$P_d = 51.2\text{W [for } (1/10) \times P_O \text{ max} = 5\text{W]}$$

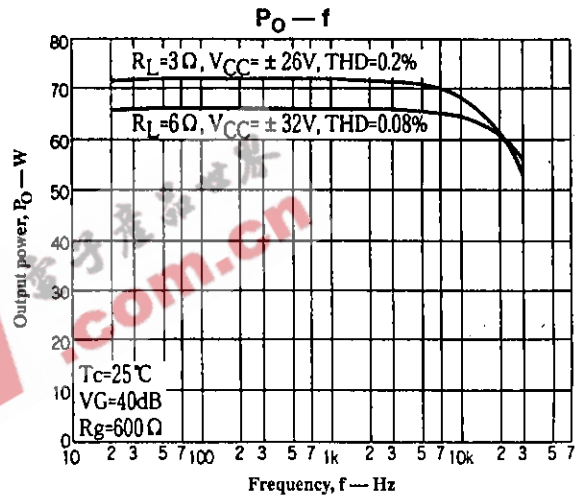

$$\text{From expression (1)'}: \theta_{c-a} < (125 - 50)/51.2 < 1.46$$

$$\text{From expression (2)'}: \theta_{c-a} < (150 - 50)/51.2 - 1.7/4 < 1.52$$

Therefore, to satisfy both expressions, the required heatsink must have a thermal resistance less than 1.46°C/W.

This heatsink design example is based on a constant-voltage supply, and should be verified within your specific set environment.
