DESCRIPTION

This data sheet describes Microsemi's AD Series 1.6A SCRs designed for medium-current control and sensing applications. Units are available in a complete range of blocking voltages from 60 to 400 volts.

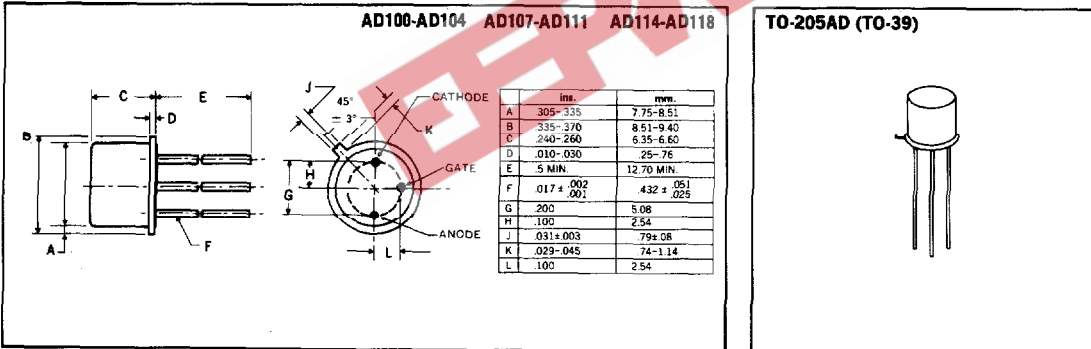

The AD100 series offers a maximum gate trigger current of 2.0 microamps making it the most sensitive device of its type. The AD107 series has a maximum I_{GT} of 20 μ A while this parameter is specified at 200 μ A for the AD114 series.
