NOTES

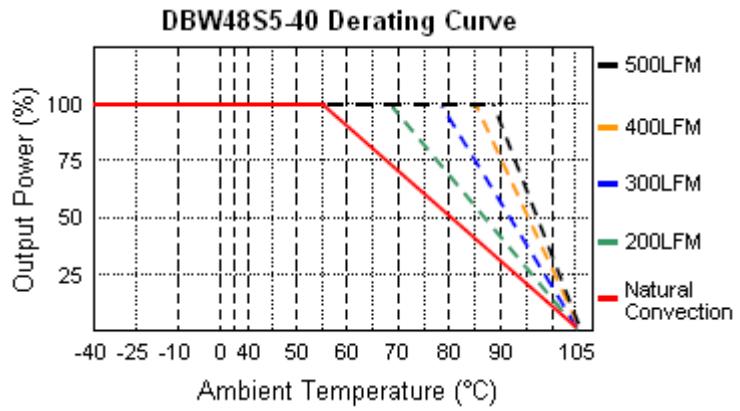

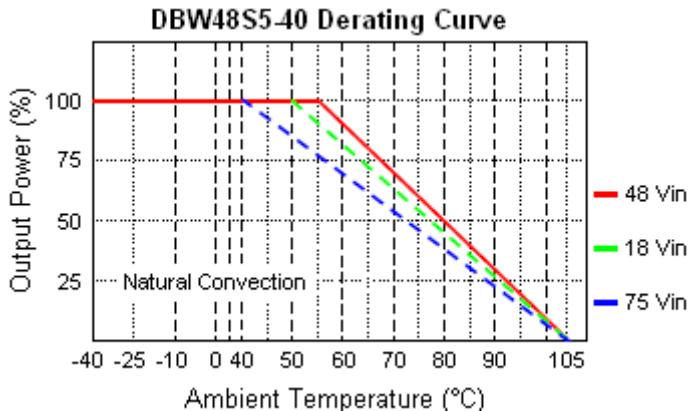

- For single output: Maximum output deviation is 10% inclusive of remote sense and trim. If remote sense is not being used, the +sense should be connected to its corresponding +OUTPUT and likewise the -sense should be connected to its corresponding –OUTPUT.
- Load regulation for dual output: Minimum load to 100% load balanced on all outputs.
- Cross regulation for dual output: asymmetrical load 25% / 100% full load.
- The ON/OFF control function: There are positive (standard) and negative logic (option). The pin voltage is referenced to negative input. To order negative logic ON/OFF control add the suffix "R" to the part number (Ex: DBW48S5-40R)
- BELLCORE TR-NWT-000332. Case I: 50% Stress, Temperature at 40°C. (Ground fixed and controlled environment). MIL-STD-217F Notice2 @ Ta=25°C, Full Load (Ground, Benign, controlled environment).
- Heat sink is optional. Please call factory for ordering details.
- The DBW series required an external filter to meet EN55022 class A.
- The dual output required a minimum loading on the output to maintain specified regulation. Operation under no-load condition will not damage these devices, however they may not meet all listed specifications.
- Output ripple & noise measured with a 0.1µF/50V MLCC.
- Typical Value at nominal input voltage.
- Maximum value at nominal input voltage and full load
- Typical Value at nominal input voltage and full load.
- Test by minimum Vin and constant resistive load.
