

**Microsemi Corp.**  
The diode experts

SANTA ANA, CA

SCOTTSDALE, AZ

For more information call:  
(602) 941-6300

**1N6036  
thru  
1N6072A**

**FEATURES**

- 1500 WATTS PEAK POWER DISSIPATION
- AVAILABLE IN STANDOFF VOLTAGES FROM 5.5V TO 185V
- DO-13 HERMETICALLY SEALED PACKAGE
- BIDIRECTIONAL
- UL RECOGNIZED (1N6070A)
- JAN/TX/TXV AVAILABLE PER MIL-S-19500/507

**DESCRIPTION**

These TAZ devices are a series of Bidirectional Silicon Transient Suppressors used in AC applications where large voltage transients can permanently damage voltage-sensitive components.

These devices are manufactured using two silicon PN, low voltage junction in a back to back configuration. They are characterized by their high surge capability, extremely fast response time, and low impedance, ( $R_{on}$ ).

TAZ has a peak pulse power rating of 1500 watts for one millisecond and therefore can be used in applications where induced lightning on rural or remote transmission lines represents a hazard to electronic circuitry. The response time of TAZ clamping action is less than  $(5 \times 10^{-9})$  sec; therefore, they can protect Integrated Circuits, MOS devices, Hybrids, and other voltage-sensitive semi-conductors and components.

This series of devices has been proven very effective as EMP Suppressors.

**MAXIMUM RATINGS**

- 1500 watts of peak pulse power dissipation at 25°C
- $t_{clamping}$  (0 volts to  $V_{(BR)}$  min): less than  $5 \times 10^{-9}$  seconds
- Operating and storage temperatures -65°C to +175°C
- Steady state power dissipation: 1.0 watts at  $T_L = 25^\circ C$ , 3/8" from body.
- Repetition rate (duty cycle): .01%

**ELECTRICAL CHARACTERISTICS**

Clamping Factor: 1.33 @ full rated power  
1.20 @ 50% rated power

Clamping Factor: The ratio of the actual  $V_C$  (Clamping Voltage) to the  $V_{(BR)}$  (Breakdown Voltage) as measured on a specific device.

FIGURE 2 TYPICAL CAPACITANCE vs. BREAKDOWN VOLTAGE

**BIDIRECTIONAL  
TRANSIENT  
ABSORPTION ZENER**

**MECHANICAL CHARACTERISTICS**

- Standard DO-13 package, glass and metal hermetically sealed
- WEIGHT: 1.5 grams (approximate)
- FINISH: All external surfaces are corrosion resistant and leads solderable.
- POLARITY: Bidirectional not marked.
- MOUNTING POSITION: Any.

# 1N6036 thru 1N6072A

\*Available in JAN, JANTX, JANTXV

**NOTE 1:** A TAZ is normally selected according to the rated "Stand Off Voltage" V<sub>RM</sub> which should be equal to or greater than the DC or continuous peak operating voltage level.
