NOTE 1 When ordering devices with tighter tolerances than specified, use a nominal V_Z voltage of 6.2 V.

NOTE 2 Measured by superimposing 0.75 mA ac rms on 7.5 mA DC @ 25°C.

NOTE 3 The maximum allowable change observed over the entire temperature range i.e., the diode voltage will not exceed the specified mV change at any discrete temperature between the established limits.

NOTE 4 Voltage measurements to be performed 15 seconds after application of DC current.

MECHANICAL CHARACTERISTICS

CASE: Hermetically sealed glass case. DO-35 (DO-204AH).
FINISH: All external surfaces are corrosion resistant and leads solderable.
THERMAL RESISTANCE: 250°C/W junction to lead at 0.375-inches from body. Metallurgically bonded DO-35's exhibit less than 100°C/W at zero distance from body.
POLARITY: Diode to be operated with the banded end positive with respect to the opposite end.
WEIGHT: 0.2 grams.
MOUNTING POSITION: Any

The curve shown in Figure 3 is typical of the diode series and greatly simplifies the estimation of the Temperature Coefficient (TC) when the diode is operated at currents other than 7.5 mA.

EXAMPLE: A diode in this series is operated at a current of 7.5mA and has specified Temperature Coefficient (TC) limits of ±0.005%/°C. To obtain the typical Temperature Coefficient limits for this same diode operated at a current of 6.0mA, the new TC limits (%/°C) can be estimated using the graph in FIGURE 3.

At a test current of 6.0mA the change in Temperature Coefficient (TC) is approximately −0.0006%/°C. The algebraic sum of ±0.005%/°C and −0.0006%/°C gives the new estimated limits of +0.0044%/°C and −0.0056%/°C.

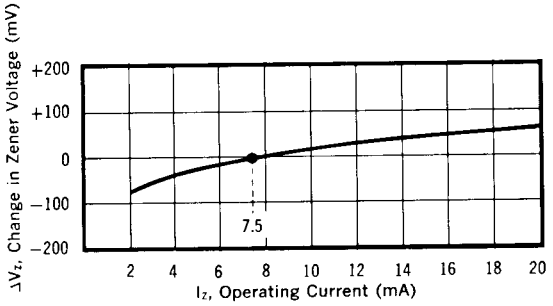

FIGURE 4

TYPICAL CHANGE OF ZENER VOLTAGE WITH CHANGE IN OPERATING CURRENT

This curve in Figure 4 illustrates the change of diode voltage arising from the effect of impedance. It is in effect an exploded view of the zener operating region of the I-V characteristic.

In conjunction with Figure 3, this curve can be used to estimate total voltage regulation under conditions of both varying temperature and current.
