

CMOS Quad 2-Input NAND Gate

Intersil's Satellite Applications Flow™ (SAF) devices are fully tested and guaranteed to 100kRAD total dose. These QML Class T devices are processed to a standard flow intended to meet the cost and shorter lead-time needs of large volume satellite manufacturers, while maintaining a high level of reliability.

The CD4011BT, Quad 2-Input NAND gate provides the system designer with direct implementation of the NAND function and supplements the existing family of CMOS gates. All inputs and outputs are buffered.

Specifications

Specifications for Rad Hard QML devices are controlled by the Defense Supply Center in Columbus (DSCC). The SMD numbers listed below must be used when ordering.

Detailed Electrical Specifications for the CD4011BT are contained in SMD 5962-96621. A "hot-link" is provided from our website for downloading.
