# 2300 Series/Microminiature Reed Relays

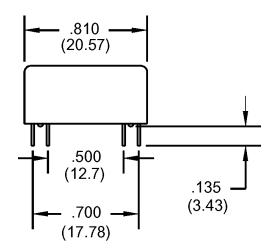

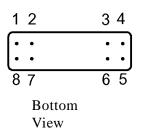

#### MULTIPOLE MICROMINIATURE REED RELAYS

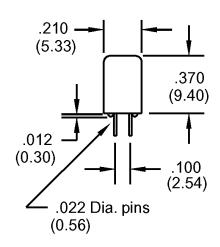

The Coto 2300 series was designed to offer the densest packaging available in a multipole reed relay. The size and footprint of the 2300 series compliment the 2200 and 2900 series microminiature relays. The 1 Form C model is constructed with individual switch capsules for the normally open and magnetically biased normally closed contacts which are more reliable than the spring actuated 1 Form C reed switches. Custom pin-outs as well as custom designs are available to meet particular applications. Special designs include 1 Form B, 2 Form B, latching, and high voltage relays.

### 2300 Series Feature

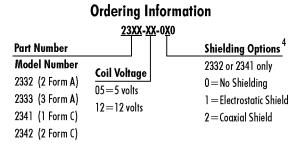

- ◆ Smallest Multipole Relay: 0.056 sq. inches/pole (3 pole relay)
- ◆ Up to 3 Form A or 2 Form C Contacts
- ♦ Hermetically Sealed Contacts
- Long Life / High Reliability
- Magnetically Shielding Steel Shell
- ◆ Optional Electrostatic Shield (on most models)

Dimensions in Inches (Millimeters)

# 2300 Series/Microminiature Reed Relays

### Notes:

- <sup>1</sup> Consult factory for life expectancy at other switching loads.
- <sup>2</sup> Release time is specified with a zener diode suppression circuit consisting of a 20 V zener diode in series with a 1N4148, connected in parallel with the coil.
- <sup>3</sup> Break-before-make action on Form C Model 2341 is not guaranteed. Consult factory if break-before-make is required.
- <sup>4</sup> Electrostatic shield is connected to pin #6. Coaxial shield is connected to pins #6 and #7.
- <sup>5</sup> This relay is polarity sensitive. Pin #3 MUST be positive.

## **Environmental Ratings**

Storage Temp: -35 °C to + 100 °C; Operating Temp: -20 °C to + 85 °C Solder Temp: 270 °C max; 10 sec. max

The operate and release voltage and the coil resistance are specified at  $25^{\circ}$ C. These values vary by approximately 0.4% / °C as the ambient temperature varies.

Vibration: 20 G's to 2000 Hz; Shock: 50 G's
