# 16-bit buffer/line driver (3-State)

## 74ABT16244A 74ABTH16244A

### FEATURES

- 16-bit bus interface
- Multiple V<sub>CC</sub> and GND pins minimize switching noise
- Power-up 3-State
- 3-State buffers
- Output capability: +64 mA/−32mA
- Live insertion/extraction permitted
- Latch-up protection exceeds 500mA per JEDEC Std 17
- ESD protection exceeds 2000 V per MIL STD 883 Method 3015 and 200 V per Machine Model
- 74ABTH16244A incorporates bus hold data inputs which eliminate the need for external pull up resistors to hold unused inputs
- Bus-hold data inputs eliminate the need for external pull-up resistors to hold unused inputs

### DESCRIPTION

The 74ABT16244A high-performance BiCMOS device combines low static and dynamic power dissipation with high speed and high output drive.

The 74ABT16244A device is a 16-bit buffer that is ideal for driving bus lines. The device features four Output Enables (1OE, 2OE, 3OE, 4OE), each controlling four of the 3-State outputs. Two options are available, 74ABT16244A which does not have the bus hold feature and 74ABTH16244A which incorporates the bus hold feature.

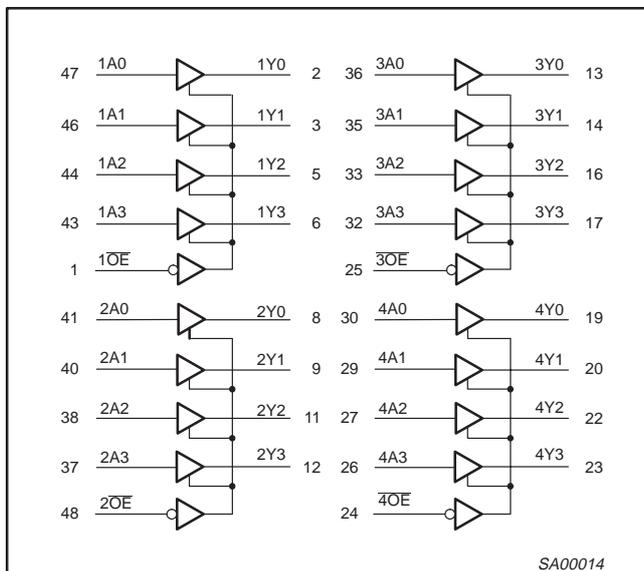

### QUICK REFERENCE DATA

| 2, 3, 5, 6<br>8, 9, 11, 12<br>13, 14, 16, 17<br>19, 20, 22, 23       | 1Y0 – 1Y3,<br>2Y0 – 2Y3,<br>3Y0 – 3Y3,<br>4Y0 – 4Y3 | Data outputs            |
| 1, 48<br>25, 24  | 1OE, 2OE,<br>3OE, 4OE                               | Output enables          |
| 4, 10, 15, 21<br>28, 34, 39, 45                                      | GND   | Ground (0V)             |
| 7, 18, 31, 42  | V <sub>CC</sub>                                     | Positive supply voltage |

## FUNCTION TABLE

| INPUTS |     | OUTPUTS |
|--------|-----|---------|
| nOE    | nAx | nYx     |
| L      | L   | L       |
| L      | H   | H       |
| H      | X   | Z       |

H = High voltage level  
L = Low voltage level  
X = Don't care  
Z = High impedance "off" state

## PIN CONFIGURATION

## 16-bit buffer/line driver (3-State)

74ABT16244A  
74ABTH16244A**ABSOLUTE MAXIMUM RATINGS<sup>1, 2</sup>**

| SYMBOL           | PARAMETER                      | CONDITIONS                  | RATING       | UNIT |
|------------------|--------------------------------|-----------------------------|--------------|------|
| V <sub>CC</sub>  | DC supply voltage              |                             | -0.5 to +7.0 | V    |
| I <sub>IK</sub>  | DC input diode current         | V <sub>I</sub> < 0          | -18          | mA   |
| V <sub>I</sub>   | DC input voltage <sup>3</sup>  |                             | -1.2 to +7.0 | V    |
| I <sub>OK</sub>  | DC output diode current        | V <sub>O</sub> < 0          | -50          | mA   |
| V <sub>OUT</sub> | DC output voltage <sup>3</sup> | output in Off or High state | -0.5 to +5.5 | V    |
| I <sub>OUT</sub> | DC output current              | output in Low state         | 128          | mA   |
|                  |                                | output in High state        | -64          |      |
| T <sub>stg</sub> | Storage temperature range      |                             | -65 to 150   | °C   |

**NOTES:**

- Stresses beyond those listed may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- The performance capability of a high-performance integrated circuit in conjunction with its thermal environment can create junction temperatures which are detrimental to reliability. The maximum junction temperature of this integrated circuit should not exceed 150°C.
- The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

**RECOMMENDED OPERATING CONDITIONS**

|                                  |   | Outputs disabled, one data input at 3.4V, other inputs at V <sub>CC</sub> or GND; V <sub>CC</sub> = 5.5V                   |                          | 100   | 250  |                                   | 250  |      |
|                                  |   | Control pins, outputs disabled, one enable input at 3.4V, other inputs at V <sub>CC</sub> or GND; V <sub>CC</sub> = 5.5V   |                          | 100   | 250  |                                   | 250  |      |

## NOTES:

- Not more than one output should be tested at a time, and the duration of the test should not exceed one second.
- This is the increase in supply current for each input at 3.4V.
- This data sheet limit may vary among suppliers.
- This is the bus hold overdrive current required to force the input to the opposite logic state.

## TEST CIRCUIT AND WAVEFORMS

**Test Circuit for 3-State Outputs**

**Input Pulse Definition**  
 $V_M = 1.5V$

**SWITCH POSITION**

| TEST      | SWITCH |
|-----------|--------|
| $t_{PLZ}$ | closed |
| $t_{PZL}$ | closed |
| All other | open   |

**DEFINITIONS**

$R_L$  = Load resistor; see AC CHARACTERISTICS for value.  
 $C_L$  = Load capacitance includes jig and probe capacitance; see AC CHARACTERISTICS for value.  
 $R_T$  = Termination resistance should be equal to  $Z_{OUT}$  of pulse generators.

| FAMILY    | INPUT PULSE REQUIREMENTS |           |       |       |       |

## Data sheet status

| Data sheet status         | Product status | Definition [1]   |
|---------------------------|----------------|--|
| Objective specification   | Development    | This data sheet contains the design target or goal specifications for product development. Specification may change in any manner without notice.  |
| Preliminary specification | Qualification  | This data sheet contains preliminary data, and supplementary data will be published at a later date. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product. |
| Product specification     | Production     | This data sheet contains final specifications. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product.   |

[1] Please consult the most recently issued datasheet before initiating or completing a design.

## Definitions

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

**Limiting values definition** — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

## Disclaimers

**Life support** — These products are not designed for use in life support appliances, devices or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

**Right to make changes** — Philips Semiconductors reserves the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
