# INTEGRATED CIRCUITS

Product specification Supersedes data of 1997 Feb 03 IC24 Data Handbook 1998 Apr 20

# 74LV27

## **FEATURES**

- Wide operating voltage: 1.0 to 5.5 V
- Optimized for Low Voltage applications: 1.0 to 3.6 V
- Accepts TTL input levels between V<sub>CC</sub> = 2.7 V and V<sub>CC</sub> = 3.6 V
- Typical V<sub>OLP</sub> (output ground bounce) < 0.8 V at V<sub>CC</sub> = 3.3 V,  $T_{amb} = 25^{\circ}C.$
- Typical V<sub>OHV</sub> (output V<sub>OH</sub> undershoot) > 2 V at V<sub>CC</sub> = 3.3 V,  $T_{amb} = 25^{\circ}C.$
- Output capability: standard
- I<sub>CC</sub> category: SSI

## QUICK REFERENCE DATA

#### GND = 0 V; $T_{amb} = 25^{\circ}C$ ; $t_r = t_f \le 2.5$ ns

| SYMBOL   | PARAMETER                              | CONDITIONS   | TYPICAL | UNIT |  |  |  |  |  |

| Cl   | Input capacitance                      | 27 . 0   | 3.5     | pF   |  |  |  |  |  |
| C <sub>PD</sub>  | Power dissipation capacitance per gate | See Notes 1 and 2                                  | 24      | pF   |  |  |  |  |  |
| <b>DTES:</b><br>CPD is used to determine the dynamic power dissipation (P <sub>D</sub> in $\mu$ W)<br>P <sub>D</sub> = CP <sub>D</sub> × V <sub>CC</sub> <sup>2</sup> × f <sub>i</sub> + $\sum$ (C <sub>L</sub> × V <sub>CC</sub> <sup>2</sup> × f <sub>o</sub> ) where: |  |  |         |      |  |  |  |  |  |

DESCRIPTION

function compatible with 74HC/HCT27.

The 74LV27 provides the 3-input NOR function.

The 74LV27 is a low-voltage Si-gate CMOS device and is pin and

#### NOTES:

- 1. C<sub>PD</sub> is used to determine the dynamic power dissipation (P<sub>D</sub> in  $\mu$ W) P<sub>D</sub> = C<sub>PD</sub> × V<sub>CC</sub><sup>2</sup> × f<sub>i</sub> +  $\sum$  (C<sub>L</sub> × V<sub>CC</sub><sup>2</sup> × f<sub>o</sub>) where: f<sub>i</sub> = input frequency in MHz; C<sub>L</sub> = output load capacitance in pF; f<sub>o</sub> = output frequency in MHz; V<sub>CC</sub> = supply voltage in V;

  - $\sum (C_L \times V_{CC}^2 \times f_0) =$  sum of the outputs.
- 2. The condition is  $V_I = GND$  to  $V_{CO}$

## ORDERING INFORMATION

| PACKAGES                    | TEMPERATURE RANGE | OUTSIDE NORTH AMERICA | NORTH AMERICA | PKG. DWG. # |
|-----------------------------|-------------------|-----------------------|---------------|-------------|
| 14-Pin Plastic DIL          | –40°C to +125°C   | 74LV27 N              | 74LV27 N      | SOT27-1     |
| 14-Pin Plastic SO           | -40°C to +125°C   | 74LV27 D              | 74LV27 D      | SOT108-1    |
| 14-Pin Plastic SSOP Type II | –40°C to +125°C   | 74LV27 DB             | 74LV27 DB     | SOT337-1    |

NOTES:
1. Stresses beyond those listed may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
2. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

# **DC ELECTRICAL CHARACTERISTICS**

Over recommended operating conditions. Voltages are referenced to GND (ground = 0V)

NOTES:

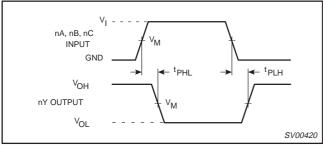

1. Unless otherwise stated, all typical values are measured at Tamb = 25°C

2. Typical values are measured at  $V_{CC} = 3.3$  V.

## AC WAVEFORMS

 $V_{M}$  = 1.5 V at  $V_{CC} \ge 2.7$  V and  $\le 3.6$  V;

 $V_M^{}=0.5\times V_{CC}$  at  $V_{CC}<2.7$  V and  $\geq4.5$  V;  $V_{OL}$  and  $V_{OH}$  are the typical output voltage drop that occur with the output load.

## **TEST CIRCUIT**

# DEFINITIONS

 $R_L$  = Load resistor  $C_L$  = Load capacitance includes jig and probe capacitiance

 $R_T$  = Termination resistance should be equal to  $Z_{OUT}$  of pulse generators.

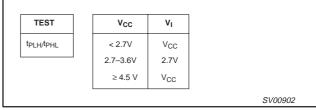

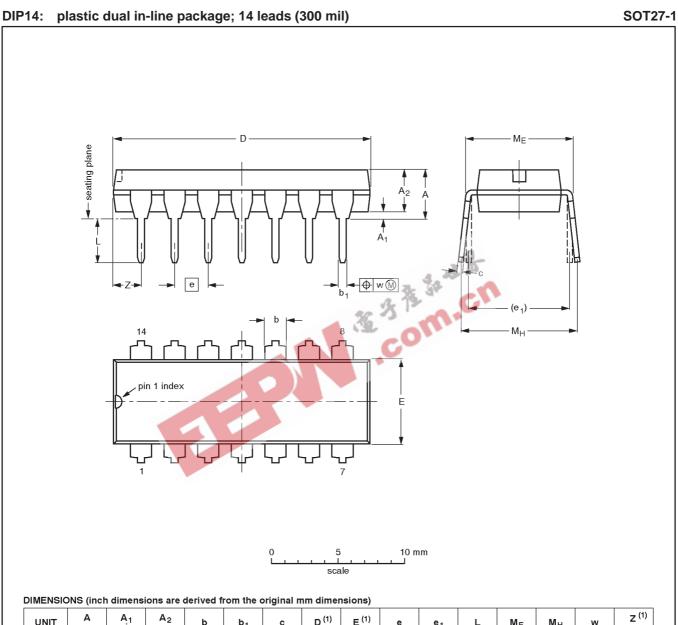

Figure 2. Load circuitry for switching times.

|                           |                        | DEFINITIONS  |
|---------------------------|------------------------|--|
| Data Sheet Identification | Product Status         | Definition   |
| Objective Specification   | Formative or in Design | This data sheet contains the design target or goal specifications for product development. Specifications may change in any manner without notice.   |
| Preliminary Specification | Preproduction Product  | This data sheet contains preliminary data, and supplementary data will be published at a later date. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product. |
| Product Specification     | Full Production        | This data sheet contains Final Specifications. Philips Semiconductors reserves the right to make changes at any time without notice, in order to improve design and supply the best possible product.  |

Philips Semiconductors and Philips Electronics North America Corporation reserve the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

#### LIFE SUPPORT APPLICATIONS

Philips Semiconductors and Philips Electronics North America Corporation Products are not designed for use in life support appliances, devices, or systems where malfunction of a Philips Semiconductors and Philips Electronics North America Corporation Product can reasonably be expected to result in a personal injury. Philips Semiconductors and Philips Electronics North America Corporation customers using or selling Philips Semiconductors and Philips Electronics North America Corporation Products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors and Philips Electronics North America Corporation for any damages resulting from such improper use or sale.
