4 X 4 REGISTER FILE
(With Open-Collector Outputs)

DESCRIPTION — The '170 contains 16 high speed, low power, transparent D-type latches arranged as four words of four bits each, to function as a 4 X 4 register file. Separate read and write inputs, both address and enable, allow simultaneous read and write operation. Open-collector outputs make it possible to connect up to 128 outputs in a wired-AND configuration to increase the word capacity up to 512 words. Any number of these devices can be operated in parallel to generate an n-bit length. The '670 provides a similar function to this device but it features 3-state outputs.

- SIMULTANEOUS READ/WRITE OPERATION
- EXPANDABLE TO 512 WORDS OF n-BITS
- TYPICAL ACCESS TIME OF 20 ns
- LOW LEAKAGE OPEN-COLLECTOR OUTPUTS FOR EXPANSION

ORDERING CODE: See Section 9
