in Outputs (Preliminary) ⁼STU162450 Configurable 4-Bit to 20-Bit Bus Switch with –2V Undershoot Protection and 25 Ω Series Resistors

Functional Description

The device can also be configured as an 8 and 16-bit device by grounding the unused pins in the 10-bit and 20-bit configurations respectively. The 8-bit configuration may also be achieved by connecting two of the 4-bit enables from the 4-bit configuration together and connecting the remaining enable pin (\overline{OE}) HIGH.

Truth Tables

(see Functional Description)

20-Bit Configuration ($S_0 = S_1 = L$)

Absolute Maximum Ratings(Note 3)

| Supply Voltage (V _{CC}) | -0.5V to +7.0V |
|--|------------------|
| DC Switch Voltage (V _S) (Note 4) | -2.0V to +7.0V |
| DC Input Control Pin Voltage | |
| (V _{IN}) (Note 5) | -0.5V to +7.0V |
| DC Input Diode Current (I _{IK}) V_{IN} < 0V | –50 mA |
| DC Output (I _{OUT}) Current | 128 mA |
| DC V _{CC} /GND Current (I _{CC} /I _{GND}) | +/- 100 mA |
| Storage Temperature Range (T _{STG}) | –65°C to +150 °C |

Recommended Operating Conditions (Note 6)

| Power Supply Operating (V _{CC)} | 4.0V to 5.5V |
|--|------------------|
| Input Voltage (V _{IN}) | 0V to 5.5V |
| Output Voltage (V _{OUT}) | 0V to 5.5V |
| Input Rise and Fall Time (t_r, t_f) | |
| Switch Control Input | 0 ns/V to 5 ns/V |
| Switch I/O | 0 ns/V to DC |
| Free Air Operating Temperature (T _A) | -40 °C to +85 °C |

Note 3: The "Absolute Maximum Ratings" are those values beyond which Note 31 the Absolute maximum Ratings are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the Electrical Characteristics tables are not guaranteed at the absolute maximum rating. The "Recommended Operating Conditions" table will define the conditions the actual during expecting. for actual device operation.

Note 4: V_S is the voltage observed/applied at either the A or B Ports across the switch.

Note 5: The input and output negative voltage ratings may be exceeded if

Note 5: The input and output negative voltage ratings may be exceeded if the input and output diode current ratings are observed. Note 6: Unused control inputs must be held HIGH or LOW. They may not float.
