

4-bit MULTIFUNCTIONAL REAL TIME CLOCK MODULE

# RTC-63421/63421M/63423

- Built-in crystal unit allows adjustment-free efficient operation.
- Alarm interruption of sec. to month and day of week possible.
- Provided with microcomputer compatible bus interface.
- Standard signal output selectable in a range of 10min. to 1024 Hz.
- Either sec. to hour and day of week or sec. to year and day of week is selectable.
- Reference area of time /alarm register is settable. Provided with RAM bits. (marked on "\*" which is shown resistor table)
- Provided with START/STOP 30 second adjusting function.
- Similar mounting method (RTC-63423) to the used for normal type SMD IC.

Model	Applicable CPU
RTC-63421	Intel bus system
RTC-63421M	Motorola bus system
RTC-63423	"MOTEL" bus system

### Specifications (characteristics)

#### Absolute Max. rating

Item	Symbol	Condition	Specifications	Unit
Power source voltage	V <sub>DD</sub>	T <sub>a</sub> =25°C	-0.3 to 7.0	V
Input voltage	V <sub>IN</sub>	T <sub>a</sub> =25°C	-0.3 to V <sub>DD</sub> +0.3	
storage temperature	T <sub>STG</sub>	RTC-63421 RTC-63421M	-55 to +85	°C
		RTC-63423	-55 to +125	
Soldering condition	T <sub>SOL</sub>	RTC-63421 RTC-63421M	Under 260°C within 10 sec. (lead part) (package should be less than 150°C)	
		RTC-63423	Twice at under 260°C within 10 sec. or under 230°C within 3 min.	

#### Operating range

Item	Symbol	Condition	Specifications	Unit
Operating voltage	V <sub>DD</sub>		4.5 to 5.5	V
Operating temperature	T <sub>OPR</sub>		-40 to +85	°C
Data holding voltage	V <sub>DH</sub>		2.0 to 5.5	V
CS data holding time	t <sub>CDR</sub>	Refer to the data holding timing	2.0 min.	µs
Operation restoring time	t <sub>R</sub>			

#### Frequency characteristics and current consumption characteristics

Item	Symbol	Condition	Specifications	Unit	
Frequency tolerance	Δf/fo	T <sub>a</sub> =25°C V <sub>DD</sub> =5V	63421A/63421MA	+15/-5 (5±10)	ppm
			63421B/63421MB	+55/-45 (5±50)	
			63423 A	+25/-15 (5±20)	
			63423	+55/-45 (5±50)	
Frequency temperature characteristics		+10 to +70°C (25°C reference temperature)	+10/-120		
		-30 to +85°C (25°C reference temperature)	+10/-220		
Aging	f <sub>a</sub>	V <sub>DD</sub> =5V, T <sub>a</sub> =25°C, first year	±5 max.	ppm/Y	
Shock resistance	S.R.	Three drops on a hard board from 75 cm or 3000G x 0.3ms x 1/2 sine wave x 3 directions	±10 max.	ppm	
Current consumption	I <sub>DD1</sub>	CS <sub>1</sub> =0V	V <sub>DD</sub> =5V	30max.	µA
	I <sub>DD2</sub>		V <sub>DD</sub> =2V	1.8 max.	

Unless otherwise stated, characteristics (specifications) shown in the above table are based on the rated operating temperature and voltage condition.

### Terminal connection

		23	(V <sub>DD</sub> )
		24	V <sub>DD</sub>

\* 1=63421M

\* 2=Motorola bus system

- (V<sub>DD</sub>) is to be same level as V<sub>DD</sub>. Do not connect it to any external terminals.
- NC is not connected internally.

**Switching characteristics**

Motorola bus system (V<sub>DD</sub> = 5V ± 0.5V, T<sub>a</sub> = 0 to + 70°C)

Item	Symbol	Min.	Max.	Unit
R/W, address setup time	t <sub>RWE</sub>	100		ns
E "H" pulse width	t <sub>EHW</sub>	220		
R/W, address hold time	t <sub>ERW</sub>	20		
E "L" pulse width	t <sub>ELW</sub>	220		
E cycle time	t <sub>EC</sub>	500		
DATA setup time	t <sub>DS</sub>	180		
DATA hold time	t <sub>DH</sub>	20		
E to data (CL=150pF)	t <sub>RD</sub>	—	120	
Data hold	t <sub>ED</sub>	10	—	

Switching characteristics on the Intel bus system are the same as those for the RTC-6242 series.

**Write mode**

**Read mode**
