SM8051L25, 25 MHz 4KB internal ROM MCU
SM8052L25, 25 MHz 8KB internal ROM MCU
SM8051C25, 25 MHz 4KB internal ROM MCU
SM8052C25, 25 MHz 8KB internal ROM MCU
SM8051C40, 40 MHz 4KB internal ROM MCU
SM8052C40, 40 MHz 8KB internal ROM MCU

Description

The SM8051/8052 series product is an 8 - bit single chip micro controller with 4/8 KB ROM embedded. It provides hardware features and a powerful instruction set, necessary to make it a versatile and cost effective controller for those applications demand up to 32 I/O pins or need up to 4/8 KB ROM memory either for program or for data or mixed.

Ordering Information

yywww
SM8051/8052ihhk

yy: year, ww:month
v: version identifier { , A, B, ...}
i: process identifier {L=3.0V ~ 3.6V, C=4.5V ~ 5.5V}
hh: working clock in MHz {25, 40}
k: package type postfix {as below table}

Features

- Working voltage: 3.0V ~ 3.6V For L Version
4.5V ~ 5.5V For C Version
- General 8051/8052 family compatible
- 12 clocks per machine cycle
- 4/8 KB internal ROM memory
- 128/256 bytes data RAM
- 2/3 16 bit timers/counters
- Four 8-bit I/O ports
- Full duplex serial channel
- Bit operation instruction
- Page free jumps
- 8-bit unsigned division
- 8-bit unsigned multiply
- BCD arithmetic
- Direct addressing
- Indirect addressing
- Nested interrupt
- Two priority level interrupt
- A serial I/O port
- Power save modes:
Idle mode and power down mode
- Code protection function
- One watch dog timer (WDT)
- Low EMI (inhibit ALE)

Note: The text of SFRs with bold type characters are Extension Special Function Registers for SM8051/8052

Extension Function Description

Watch Dog Timer

The Watch Dog Timer (WDT) is a 16-bit free-running counter that generate reset signal if the counter overflows. The WDT is useful for systems which are susceptible to noise, power glitches, or electronics discharge which causing software dead loop or runaway. The WDT function can help user software recover form abnormal software condition. The WDT is different from Timer0, Timer1 and Timer2 of general 8052. To prevent a WDT reset can be done by software periodically clearing the WDT counter.

The SM8051/8052 WDT has selectable divider input for the time base source clock. To select the divider input, the setting of bit2~bit0 (PS2~PS0) OF Watch Dog Timer Control Register (WDTC) should be set accordingly.

To enable the WDT is done by setting 1 to the bit 7 (WDTE) of WDTC. After WDTE set to 1, the 16-bit counter starts to count with the selected time base source clock which set by PS2~PS0. It will generate a reset signal when overflows. The WDTE bit will be cleared to 0 automatically when SM8051/8052 been reset, either hardware reset or WDT reset.

To reset the WDT is done by setting 1 to the bit 5 (CLEAR) of WDTC. This will clear the content of the 16-bit counter and let the counter re-start to count from the beginning.

Watch Dog Timer Registers - WDT Control Register (WDTC, \$9F)

Reset value	WDTE	Unused	CLEAR	Unused	Unused	PS2	PS1	PS0
	0	*	0	*	*	0	0	0
	MSB				LSB			

WDTE : Watch Dog Timer enable bit

CLEAR : Watch Dog Timer reset bit

PS2 ~ PS0 : clock source divider bit

PS [2:0]	Divider (OSC in)	Time Period (ms) @40MHZ
000	8	13.1
001	16	26.21
010	32	52.42
011	64	104.8
100	128	209.71
101	256	419.43
110	512	838.86
111	1024	1677.72

Watch Dog Timer Register - System Control Register (SCONF, \$BF)

Reset value	WDR	Unused	Unused	Unused	Unused	Unused	Unused	ALEI
	0	*	*	*	*	*	*	0
	MSB				LSB			

WDR : Watch Dog Timer Reset. When system reset by Watch Dog Timer overflow, WDR will be set to 1
 ALEI : ALE output inhibit bit, to reduce EMI

The bit 7(WDR) of SCONF is Watch Dog Timer Reset bit. It will be set to 1 when reset signal generated by WDT overflow. User should check WDR bit whenever un-predicted reset happened.

Reduce EMI Function

The SM8051/8052 allows user to reduce the EMI emission by setting 1 to the bit 0 (ALEI) of SCONF register. This function will inhibit the clock signal in Fosc/6Hz output to the ALE pin. This function is available when there is no external program memory or no external data RAM in the system.

Operating Conditions

Symbol	Description	Min.	Typ.	Max.	Unit.	Remarks
TA	Operating temperature	0	25	70	°C	Ambient temperature under bias
