

54F/74F151A 8-Input Multiplexer

General Description

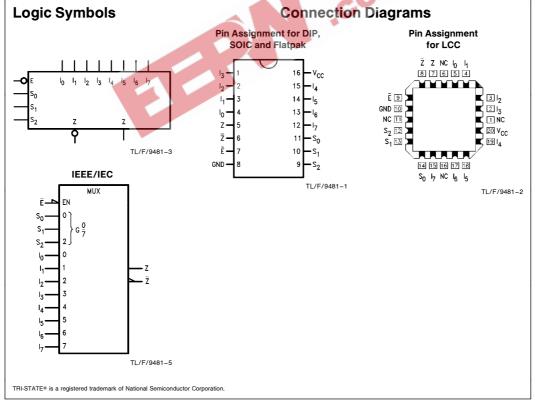

The 'F151A is a high-speed 8-input digital multiplexer. It provides in one package the ability to select one line of data from up to eight sources. The 'F151A can be used as a

universal function generator to generate any logic function of four variables. Both assertion and negation outputs are provided.

Functional Description

The 'F151A is a logic implementation of a single pole, 8-position switch with the switch position controlled by the state of three Select inputs, S $_0$, S $_1$, S $_2$. Both assertion and negation outputs are provided. The Enable input (\overline{E}) is active LOW. When it is not activated, the negation output is HIGH and the assertion output is LOW regardless of all other inputs. The logic function provided at the output is:

$$Z = \overline{E} \bullet (I_0 \overline{S}_2 \overline{S}_1 \overline{S}_0 + I_1 \overline{S}_2 \overline{S}_1 S_0 + I_2 \overline{S}_2 S_1 \overline{S}_0 + I_3 \overline{S}_2 S_1 S_0 + I_4 S_2 \overline{S}_1 \overline{S}_0 + I_5 S_2 \overline{S}_1 S_0 + I_6 S_2 S_1 \overline{S}_0 + I_7 S_2 S_1 S_0)$$

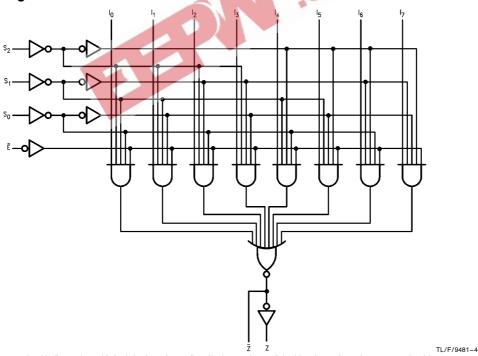

The 'F151A provides the ability, in one package, to select from eight sources of data or control information. By proper manipulation of the inputs, the 'F151A can provide any logic function of four variables and its negation.

Note 1: Absolute maximum ratings are values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

Note 2: Either voltage limit or current limit is sufficient to protect inputs.

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
