

## TIP700 16 (8) Digital Outputs, high and low side switches

### Application Information

The TIP700 is an IndustryPack® compatible module providing 16 (8) digital outputs with galvanic isolation via optocouplers. The outputs are isolated against each other in groups of two.

All outputs resist short-circuits and are protected against thermal overload. The outputs are capable of driving 0.5A per channel. Each output can be configured individually as high or low side switch.

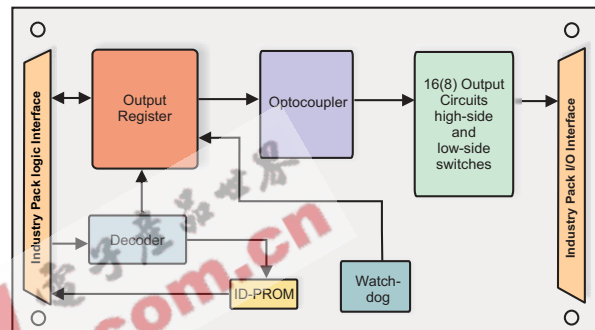

For First-Time-Buyers the engineering documentation TIP700-ED is recommended. The engineering documentation includes TIP700-DOC, schematics and data sheets.

Driver software (TIP700-SW-xx) is available for different operating systems.

### Technical Information

- Interface according to IndustryPack specification
- Identification-PROM supports auto-configuration
- Single Size IndustryPack
- 16 (8) digital outputs, high and low side switches
- 24V signal voltage, current per output 0.5A
- Optocouplers for galvanic isolation of outputs to computer system
- Outputs are isolated against each other in groups of two
- Outputs are short-circuit protected
- Outputs protected against thermal overload
- Watchdog timer resets all channels in case of triggering failure
