

# FIBER COUPLED LASER MODULE (785 NM)

## FCLM785 Series

The FCLM™ Laser Module is a temperature stabilized semiconductor laser coupled with single mode fiber. It features very low M<sup>2</sup> value Gaussian beam output with excellent beam pointing stability at a wide temperature dynamic range. The unique designed electrical driver enable this optical engine has the lowest power consumptions compare to the similar product in the industry. The FCLM™ Laser Module is a Class III b laser product

### Performance Specification

|                                   |    | Condition      | Min                          | Typ     | Max | Unit    |
|-----------------------------------|----|----------------|------------------------------|---------|-----|---------|
| <b>Optical Performance</b>        |    |                |                              |         |     |         |
| Wavelength                        |    | T= 25°C        |                              | 785     |     | nm      |
| Output Power                      | 15 | T= 25°C        | 15                           |         |     | mW      |
|                                   | 50 | T= 25°C        | 50                           |         |     | mW      |
| Noise(RMS)                        |    | 10~20 MHz      |                              | 0.1     | 0.3 | %       |
| Power Stability                   |    | 1hrs, T= 25°C  |                              | 0.25    | 0.5 | %       |
| Power Stability                   |    | 24hrs, T= 25°C |                              | 0.75    | 1   | %       |
| Polarization Extinction Ratio     |    |                | 15                           |         |     | dB      |
| <b>Collimated Beam Parameters</b> |    |                |                              |         |     |         |

| Power Supply                      |    |                |                              | 9       |     | V       |
| Power Consumption                 |    |                |                              | 3       | 10  | W       |
| Current(TEC)                      |    |                |                              |         | 2   | A       |
| Current(LD)                       |    |                |                              |         | 200 | mA      |
| Temperature Stability             |    |                |                              | 0.2     |     | °C      |
| Control                           |    |                |                              | ACC     |     |         |
| Power Setting                     |    |                | 0% ~ 100% output power       |         |     |         |
| <b>Environmental Conditions</b>   |    |                |                              |         |     |         |
| Storage Temperature               |    |                | 0 to + 50                    |         |     | °C      |
| Operation Temperature             |    |                | + 10 to + 40                 |         |     | °C      |
| Operation Humidity                |    |                | No Condensing                |         |     |         |
| Package Dimensions *              |    |                | 112 x 56 x 26.5              |         |     | mm      |

### Features

- ◆ Plug & Play
- ◆ ESD Protection
- ◆ Power Adjustable
- ◆ LD Current Full Protection
- ◆ LD Temperature Stabilized
- ◆ Compact Size

### Applications

- ◆ Polarization Maintaining Fiber
- ◆ High Speed Modulation
- ◆ Remote Control
- ◆ Collimated & Focused Beam
- ◆ Metal Jacket Protection

Note:

\* The mechanical tolerance should be +/-0.2 mm on all package dimensions unless otherwise custom specified.

**Ordering Information**

Oplink can provide a remarkable range of customized optical solutions. For detail, please contact Oplink's OEM design team or account manager for your requirements and ordering information (510) 933-7200.

This component does not comply with the Federal Regulations (21 CFR Subchapter1 ) as administered by the Center for Devices and Radiological health. Purchaser acknowledges that his/her products must comply with these regulations before they can be sold to a customer. The output light from this product is harmful to a human body even if it is invisible. Avoid looking at the output of this product directly, or through a lens during operation. Observance of operation should be through a TV camera or related equipment. Refer to IEC 825-1 and 21 CFR 1040.10-1040.11 as a radiation safety standard for laser products.

Oplink follows a policy of continuous product improvement. Specifications are subject to change without prior notice. The module's warranty is 1 year.
