

ICS844023I

FEMTOCLOCKSTM CRYSTAL-TO- LVDS
CLOCK GENERATOR

GENERAL DESCRIPTION

The ICS844023I is an Ethernet Clock Generator and a member of the HiPerClocks[™] family of high performance devices from ICS. The ICS844023I uses an 18pF parallel resonant crystal over the range of 24.5MHz - 34MHz. For Ethernet appli-

cations, a 25MHz crystal is used to generate 250MHz. The ICS844023I has excellent <1ps phase jitter performance, over the 1.875MHz - 20MHz integration range. The ICS844023I is packaged in a small 8-pin TSSOP, making it ideal for use in systems with limited board space.

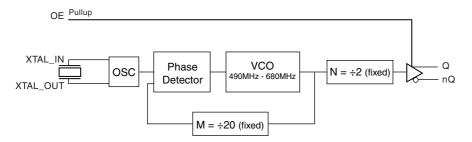

FEATURES

- · One Differential LVDS output
- Crystal oscillator interface, 18pF parallel resonant crystal (24.5MHz - 34MHz)
- Output frequency range: 245MHz 340MHz
- VCO range: 490MHz 680MHz
- RMS phase jitter @ 250MHz, using a 25MHz crystal (1.875MHz - 20MHz): 0.38ps (typical)
- 3.3V or 2.5V operating supply
- -40°C to 85°C ambient operating temperature
- Available in both standard and lead-free RoHS-compliant packages

	Inputs

TABLE 1. PIN DESCRIPTIONS

Number	Name	Ту	ре	Description
1	V_{DDA}	Power		Analog supply pin.
2	GND	Power		Power supply ground.
3, 4	XTAL_OUT, XTAL_IN	Input		Crystal oscillator interface. XTAL_IN is the input, XTAL_OUT is the output.
5	OE	Input	Pullup	Output enable pin. When HIGH, Q/nQ output is active. When LOW, the Q/nQ output is in a high impedance state. LVCMOS/LVTTL interface levels.
6, 7	nQ, Q	Output		Differential clock outputs. LVDS interface levels.
8	V _{DD}	Power		Core supply pin.

NOTE: Pullup refers to internal input resistors. See Table 2, Pin Characteristics, for typical values.

TABLE 2. PIN CHARACTERISTICS

Symbol	Parameter	Test Conditions	73	Minimum	Typical	Maximum	Units
C _{IN}	Input Capacitance	132	28		4		рF
R _{PULLUP}	Input Pullup Resistor	C			51		kΩ

ICS844023I

FEMTOCLOCKSTM CRYSTAL-TO- LVDS CLOCK GENERATOR

ABSOLUTE MAXIMUM RATINGS

Supply Voltage, V_{nn} 4.6V

Inputs, V_{i} -0.5V to V_{DD} + 0.5 V

Outputs, I_O (LVDS)

Continuous Current 10mA Surge Current 15mA

Package Thermal Impedance, θ_{JA} 101.7°C/W (0 mps)

Storage Temperature, T_{STG} -65°C to 150°C

NOTE: Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These ratings are stress specifications only. Functional operation of product at these conditions or any conditions beyond those listed in the *DC Characteristics* or *AC Characteristics* is not implied. Exposure to absolute maximum rating conditions for extended periods may affect product reliability.

Table 3A. Power Supply DC Characteristics, $V_{DD} = V_{DDA} = 3.3V \pm 5\%$, Ta = -40°C to 85° C

Symbol	Parameter	Test Condition	ns ,	Minimum	Typical	Maximum	Units

APPLICATION INFORMATION

Power Supply Filtering Techniques

As in any high speed analog circuitry, the power supply pins are vulnerable to random noise. The ICS844023I provides separate power supplies to isolate any high switching noise from the outputs to the internal PLL. V_{DD} and V_{DDA} should be individually connected to the power supply plane through vias, and bypass capacitors should be used for each pin. To achieve optimum jitter performance, power supply isolation is required. Figure 1 illustrates how a 10Ω resistor along with a $10\mu\text{F}$ and a $.01\mu\text{F}$ bypass capacitor should be connected to each V_{DDA} pin.

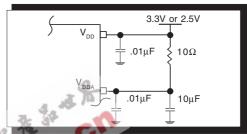

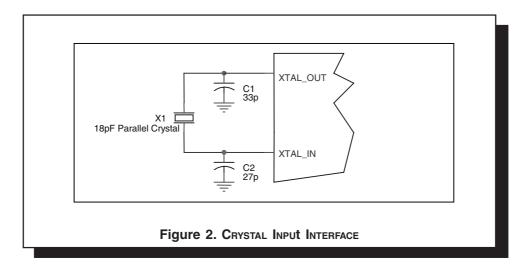

FIGURE 1. POWER SUPPLY FILTERING

CRYSTAL INPUT INTERFACE

The ICS844023I has been characterized with 18pF parallel resonant crystals. The capacitor values, C1 and C2, shown in *Figure 2* below were determined using a 25MHz, 18pF parallel

resonant crystal and were chosen to minimize the ppm error. The optimum C1 and C2 values can be slightly adjusted for different board layouts.

ICS844023I

FEMTOCLOCKSTM CRYSTAL-TO- LVDS CLOCK GENERATOR

3.3V, 2.5V LVDS DRIVER TERMINATION

A general LVDS interface is shown in Figure 3. In a 100 Ω differential transmission line environment, LVDS drivers require a matched load termination of 100 Ω across near

the receiver input. For a multiple LVDS outputs buffer, if only partial outputs are used, it is recommended to terminate the un-used outputs.
