

Optocoupler with Phototriac Output

Description

The K3010P(G) series consists of a phototransistor optically coupled to a gallium arsenide infrared-emitting diode in a 6-lead plastic dual in-line package. The elements are mounted on one leadframe using a **coplanar technique**, providing a fixed distance between input and output for highest safety requirements.

Applications

Circuits for safe protective separation against electrical shock according to safety class II (reinforced isolation):

- For appl. class I – IV at mains voltage $\leq 300\text{ V}$
- For appl. class I – III at mains voltage $\leq 600\text{ V}$ according to VDE 0884, table 2, suitable for:

Monitors, air conditioners, line switches, solid state relays, microwaves.

VDE Standards

These couplers perform safety functions according to the following equipment standards:

- **VDE 0884**
Optocoupler for electrical safety requirements
- **IEC 950/EN 60950**
Office machines (applied for reinforced isolation for mains voltage $\leq 400\text{ V}_{\text{RMS}}$)
- **VDE 0804**
Telecommunication apparatus and data processing
- **IEC 65**
Safety for mains-operated electronic and related household apparatus

Note: Pin 5 must not be connected

Features

Approvals:

- **BSI:** BS EN 41003, BS EN 60095 (BS 415), BS EN 60950 (BS 7002), Certificate number 7081 and 7402
- **FIMKO (SETI):** EN 60950, Certificate number 12398
- **Underwriters Laboratory (UL)** 1577 recognized, file number E-76222
- **VDE 0884**, Certificate number 94778

VDE 0884 related features:

- Rated impulse voltage (transient overvoltage) $V_{IOTM} = 6 \text{ kV peak}$
- Isolation test voltage (partial discharge test voltage) $V_{pd} = 1.6 \text{ kV}$
- Rated isolation voltage (RMS includes DC) $V_{IOWM} = 600 \text{ V}_{RMS}$ (848 V peak)

- Rated recurring peak voltage (repetitive) $V_{IORM} = 600 \text{ V}_{RMS}$
- Creepage current resistance according to VDE 0303/IEC 112
Comparative Tracking Index: CTI = 275
- Thickness through insulation $\geq 0.75 \text{ mm}$

General features:

- Isolation materials according to UL 94-VO
- Pollution degree 2 (DIN/VDE 0110 resp. IEC 664)
- Climatic classification 55/100/21 (IEC 68 part 1)
- Special construction:
Therefore, extra low coupling capacity of typical 0.2 pF, high **Common Mode Rejection**
- I_{FT} offered in 3 groups
- Coupling System C

 $R_L = 33 \text{ k}\Omega$
 dv/dt_{crq}
 $V_{eff} = 30 \text{ V}$
 (Sine wave)
 $R_L = 2 \text{ k}\Omega$

Figure 1. Test circuit for dv/dt_{cr} and dv/dt_{crq}

- dv/dt_{cr} Highest value of the "rate of rise of off-state voltage" which does not cause any switching from the off-state to the on-state
- dv/dt_{crq} Highest value of the "rate of rise of communicating voltage" which does not switch on the device again, after the voltage has decreased to zero and the trigger current is switched from I_{FT} to zero

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Telefunken products for any unintended or unauthorized application, the buyer shall indemnify Vishay Telefunken against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
