

Features

- 1. Opaque type, mini-flat package.
- 2.Subminiature type(The volume is smaller than that of our conventional DIP type by as far
- 3.Isolation voltage between input and output Viso:3750Vrms.
- 4. Employs double transfer mold technology.
- 5. Recognized by UL and CUL, file NO.E225308.
- 6.Package: 1000Pcs / Reel.
- 7.RoHS Compliant.

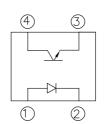

Applications

- · Com.cn 1. Hybrid substrates that require high density mounting.
- 2. Programmable controllers.

* NOTES ON HANDLING

1.Recommended soldering conditions (Dip soldering)

(1) Dip soldering

Temperature 260 or below (molten solder temperature)

Time Less than 10 seconds.

Cycle One cycle allowed to be dipped in solder including plastic nold portion.

Flux Rosin flux containing small amount of chlorine

(The flux with a maximum chlorine content of 0.2 Wt % is recommended.)

(2) Cautions

Fluxes

Avoid removing the residual flux with freon-based and chlorine-based cleaning solvent.

2. Cautions regarding noise

Be aware that power is suddenly into the component any surge current may cause damage happen, even if the voltage is within the absolute maximum ratings.

APPROVED: J. Lu CHECKED: Tracy Deng DRAWN: Y.W.WANG ERP:1205000034

NOTES ON HANDLING

1.Recommended soldering conditions

(1).Infrared reflow soldering

· Peak reflow temperature 235 ° C or below(package surface temperature)

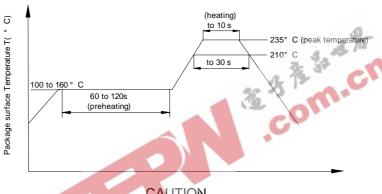

• Time of temperature higher than 210 ° C 30 seconds or less

· Number or reflows Three

 Flux Rosin flux containing small amount of chlorine(The flux with a

maximum chlorine content of 0.2Wt % is recommended.)

Recommended Temperature Profile of infrared Reflow

CAUTION

Within this device there exists GaAs (Gallium Arsenide) material which is a harmful substance if ingested. GaAs dust and fumes are toxic. Do not break, cut or pulverize the product, or use chemicals to dissolve them.

RESTRICTIONS ON PRODUCT USE

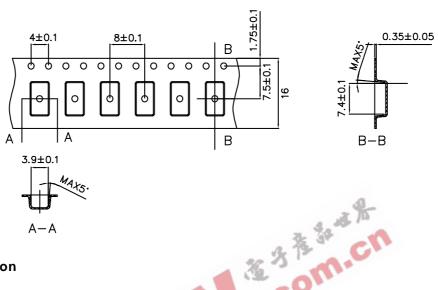

- The information in this document is subject to change without notice. Before using this document, please confirm that this is the latest version. Not all devices / types available in every country.
- We are mention about our product quality stablity, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing KINGBRIGHT products, to observe standards of safety, and to a avoid situations in which a malfunction or failure of a KINGBRIGHT product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that KINGBRIGHT products are used within specified operating ranges as set forth in the most recent products specifications.
