3. Muting function (pin⑳)

By means of controlling pin⑳ less than 0.5V, it can make the audio muting condition.

The muting time constant is decided by R_1 and C_4 and these parts is related the pop noise at power ON/OFF.

The series resistance ; R_1 must be set up less than $15k\Omega$, we recommend $10k\Omega$.

The muting function have to be controlled by a transistor, FET and μ -COM port which has $I_{MUTE} > 250\mu A$ ability.

Terminal ⑳ must not be pulled up and it shall be controlled by OPEN/LOW.

4. AUX. Input (pin⑩)

The pin⑩ is for input terminal of AUX. amplifier.
The total gain is 0dB by using of AUX. amplifier.
Therefore, the μ -COM can directly drive the AUX.
amplifier.

BEEP sound or voice synthesizer signal can be input
to pin⑩ directly.

5. DIAGNOSIS OUTPUT (pin⑳)

The diagnosis output terminal of pin⑳ has open collector output structure on chip as shown in Fig.6.

In unusual case that output terminal of Power Amp. is condition of output to V_{CC} or output to GND short and over voltage input mode, it is possible to protect all the system of apparatus as well as power IC protection.

In case of being unused this function, use this IC as open-connection on pin⑳.

6. Output Clip Detection Function (pin⑳)

The output clip detection terminal of pin⑳ has the open collector output structure on chip as shown in Fig.9. In case that the output waveform is clipping, the clip detection circuit is operated and NPN Tr. is turned on.

It is possible to improve the audio quality with controlling the volume, tone control circuit through L.P.F. smoothing circuit as shown in Fig.9.

In case of being unused this function, use this IC as open connection on pin⑳.

7. Cross talk

The cross talk characteristics of the IC is not good between OUT1 and 2, OUT3 and 4.
So we recommend to use by below method.

OUT1,2	L-ch (or R-ch)
OUT3,4	R-ch (or L-ch)

And, please refer to below table in case of applying the AUX, IN because it is out to OUT1 and 4.

ex)

OUT1	Front	L-ch (or R-ch)	AUX. OUT
OUT2	Rear		-
OUT3	Rear	R-ch (or L-ch)	-
OUT4	Front		AUX. OUT
