

**GENERAL PURPOSE** HIGH ISOLATION VOLTAGE SINGLE TRANSISTOR TYPE HIGH COLLECTOR VOLTAGE PHOTOCOUPLER SERIES

#### **FEATURES**

- 1. High isolation voltage between input and output (Viso=5000 Vrms).
- 2. High Collector-emitter voltage (Vceo=70V).
- 3.Compact dual-in-line package KB836:3-channel type
- SAN TOM.COM.COM. 4. Recognized by UL and CUL, file NO. E225308.
- 5.RoHS compliant.

#### DESCRIPTION

- 1.The KB836 (3-channel) is optically coupled isolators containing
  - a GaAS light emitting diode and an NPN silicon phototransistor.
- 2.The lead pitch is 2.54mm.
- 3. Solid insulation thickness between emitting diode and output phototransistor:>=0.6mm.

#### **APPLICATIONS**

- 1.Computer terminals.
- 2.Registers,copiers,automatic vending machines.
- 3. System appliances, measuring instruments.
- 4. Programmable logic controller.
- 5. Signal transmission between circuits of different potentials and impedances.

#### \*NOTES ON HANDLING

# 逐步<sup>强强</sup>。cn 1.Recommended soldering conditions (Dip soldering)

# (1) Dip soldering

Temperature 260 °C or below (molten solder temperature)

Time Less than 10 seconds.

Cycle One cycle allowed to be dipped in solder including plastic mold portion.

Flux Rosin flux containing small amount of chorine

(The flux with a maximum chlorine content of 0.2 Wt % is recommended.)

## (2) Cautions

Fluxes

Avovid removing the residual flux with freon-based and chlorine-based cleaning solvent.

#### 2. Cautions regarding noise

Be aware that power is suddenly into the componment any surge current may cause damage happen, even if the voltage is within the absolute maximum ratings.

SPEC NO: DSAD1547 **REV NO: V.4** DATE: MAR/17/2005 PAGE: 6 OF 8 APPROVED: J. Lu **CHECKED: Tracy Deng** DRAWN: Y.CHENG ERP: 1205000040

#### **CAUTION**

Within this device there exists GaAs (Gallium Arsenide) material which is a harmful substance if ingested.

GaAs dust and fumes are toxic. Do not break, cut or pulverize the product, or use chemicals to dissolve them.

#### RESTRICTIONS ON PRODUCT USE

- The information in this document is subject to change without notice. Before using this document, please confirm that this is the latest version. Not all devices / types available in every country.
- We are mention about our product quality stability, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing KINGBRIGHT products, to observe standards of safety, and to a avoid situations in which a malfunction or failure of a KINGBRIGHT product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that KINGBRIGHT products are used within specified operating ranges as set forth in the most recent products specifications.
