### Description

The OPT-1250xxxx series from DELTA is a 1X9 transceiver module designed expressly for high-speed communication applications that require rates of up to 1.25Gbit/sec. It is compliant with the Gigabit Ethernet standards as well as 1x Fiber channel standards.

The OPT-1250xxxx transceivers are provided with the SC receptacle that is compatible with the industry standard SC connector.

The post-amplifier of the OPT-1250xxxx also includes a Signal Detect circuit that provides a PECL or TTL logic-Low output when an unusable optical signal level is detected. (see order information)

The OPT-1250xxxx transceiver is a Class 1 eye safety product. The optical power levels, under normal operation, are at eye safe level.

### Applications

- Gigabit Ethernet/Fast Ethernet
- Switched backplane applications
