### DESCRIPTION

The PLL500-17B/27B/37B are a low cost, high performance, low phase noise, and high linearity VCXO family for the 17 to 130MHz range, providing less than -130dBc at 10kHz offset. The very low jitter (2.5 ps RMS period jitter) makes these chips ideal for applications requiring voltage controlled frequency sources. The IC's are designed to accept fundamental resonant mode crystals.
