

**FAST RECOVERY
RECTIFIER DIODE**

Description/Features

The SA120FA..series combines:

- Fast soft recovery QUIET-IR Rectifiers
- In an industry standard SOT 227 isolated module package
- The QUIET-IR Rectifiers series has been optimized for combined short reverse recovery time and low forward voltage drop.
- The glass passivation ensures stable reliable operation in the most severe temperature and power cycling conditions.
- The direct bonded copper internal structure guarantees isolation exceeding standard requirements

$$V_F < 1.2V @ 60A$$

$$t_{rr} = 150ns$$

$$V_{RRM} 200 \text{ to } 600V$$

Typical application are :

- Output rectification and freewheeling in inverters, chopper and welders.
- Input rectification where severe restriction on conducted EMI shall be met.
