

GENERAL DESCRIPTION

FUNCTIONAL BLOCK DIAGRAM

designed for low power applications.

TC1030

LINEAR BUILDING BLOCK – QUAD LOW POWER OF AMP

FEATURES

- **Optimized for Single Supply Operation**
- Small, 14-pin SOIC (Narrow) package
- Ultra Low Input Bias Current Less than 100pA
- Low Quiescent Current 12µA max
- Operates Down to $V_{DD} = 1.8V$

APPLICATIONS

- **Power Supply Circuits**
- **Embedded Systems**
- Instrumentation
- **Portable Equipment**
- **Consumer Products**

Packaged in a 14-pin narrow (0.150"W) SOIC or DIP, the TC1030 is ideal for battery operated applications.

= 1.8 V.

The TC1030 is a quad, low power operational amplifier

It is designed specifically for operation from a single

supply, however, operation from dual supplies is also pos-

sible, and the power supply current drain is independent of the magnitude of the power supply voltage. Supply current

is 12µA maximum and the TC1030 operates down to V_{DD}

ORDERING INFORMATION

Part No.	Package	Temp. Range	
TC1030COD	14-Pin SOIC (Narrow)	0°C to +70°C	
TC1030CPD	14-Pin Plastic DIP	0°C to +70°C	
TC1030CQR	16-Pin QSOP	0°C to +70°C	
TC1030EOD	14-Pin SOIC (Narrow)	- 40°C to +85°C	
TC1030EPD	14-Pin Plastic DIP	– 40°C to +85°C	
TC43EV	Evaluation Kit for Linear
