Thermal Sensors MOXIE ® (NTC)

FEATURES
– high sensitivity
– quick reaction
– hysteresis approx. 3–6 °C
– excellent reliablility
– long service life
– no selecting, no adjusting
– no corrosion of contact surface
  as semi-conductor
– no +/– polarity
– can be used as logical control element
– isolated casing
– easy installation
– can be delivered in chip form

CONSTRUCTION

Moxies are a family of variable resistance thermal sensors having a highly specific "transition region". Within this transition region the devices typically exhibit a negative temperature coefficient ranging from 40 % per °C to 300 % per °C. Below the transition region they exhibit a linear "thermistor" characteristic of –2 to –4%/°C.

Moxies are available in a TO – 18 transistor package (code TS 3) with two lead-wires, or as individual, trimmed clips.

The Moxie is a solid state component produced by thin film technology. A sapphire die is mounted on a gold plated header and connected to the therminals by gold-wire bonding.

APPLICATIONS

Sensors for temperature protection, control and limiting.

Voltage, current and frequency limiters in electronics.

Examples:

Overtemperature protector for power semi-conductors, such as transistors, power output stages, amplifiers.

Temperature control of electronic appliances and electric equipment.

Temperature sensor for signalling systems and fire detectors .
Control of componentry in industrial and entertainment electronics.

Protection of electronic circuits, such as computers or battery chargers.

TS3-85	Resistance	65	Heating	25	45	90	kΩ
	Resistance	85	Heating		1.5		kΩ
	Resistance	100	Heating	75	150	330	Ω
	Sensitivity (¹)	85	Heating	30	40		%/°C
	Latching Current (²)	–	D.C. Volts	1.4	2.0	2.6	mA

Notes: (1) Sensitivity is defined as the percentage of resistance change per variation of 1 °C in temperature.
(2) Latching current is the smallest current that will cause the device to make changes in resistance while it's cooling from transition to a lower temperature.

MOUNTING AND INSTALLATION

Because of its construction good heat transfer can be achieved between the application and the Moxie.

For easy mounting, the Moxie can be supplied with a mounting tab (code TS3- XX-B3 or TS3-XX-C3).

QUALITY

Individual testing according to manufacturer's standard.

All data given are average values.
