## Product Description

The WJZ1020 is a passive double-balanced diode-ring mixer that provides high dynamic range performance in a Lead Free/ RoHS-compliant surface mount package. The mixer is nominally driven with a LO input power of +17 dBm to optimize its performance. Other WJZ models are available for other LO drive levels.

Targeted applications include frequency up/down conversion, modulation and demodulation for receivers and transmitters used in 2.5G and 3G GSM/CDMA/W-CDMA systems. The device can also be used in Radar, Satellite, Test / Medical Instruments, Avionics communications and Navigation markets.

## Mechanical Information

This package is lead-free/RoHS-compliant. The plating material is lead-free Tin (Sn). It is compatible with lead-free (maximum 260°C reflow temperature) and recommend 245°C reflow temperature soldering processes. Also recommend adding active flux of 2% during solder reflow.

## Application Circuit

Notes:

1. Circuit board material: .021" FR-4, 2 layers, .025" total thickness
2. Blocking capacitors are required on the ports (pins 4, 6, 8) if any dc signal is present.
